Homepage

Header

- Logo: Called “Test_logo.png”. Links back to the homepage. When the logo is clicked it sends the user to the homepage
- Navigation bar
    - Home: a tab/link labeled “HOME” that sends the user to the homepage when clicked
    - About: a tab/link labeled “ABOUT” that sends the user to an “About the project” page when clicked

Sidebar

- Located on the home page. Placed on the right-hand side of the page
- Cycles through the provided pictures of airplanes, trains, cars, buses, and various famous destinations in the United States(will implement in a future sprint)

Main Content

- Structured similarly to the following expedia page: https://www.expedia.com/
- 6 buttons, each labeled after a transit type:
    - Located above the “Address A” and “Address B” text boxes
    - Each button is in a row with each button next to one another
    - When the button is clicked it is greyed out, when it is clicked again it is un greyed out
    - Pressing the button removes the travel option (e.g. bus, greyhound bus, plane, car, train) from the travel routes so that the greyed out travel route is not displayed or included in the transit calculation
    - Button 0 is labeled “All Types”
    - Button 1 is labeled “Car”
    - Button 2 is labeled “Planes”
    - Button 3 is labeled “Trains”
    - Button 4 is labeled “Public Buses”
    - Button 5 is labeled “Greyhound”
- Text box labeled “Address A”:
    - Located at the top of the page
    - A textbox that the user can type an address into
    - Autocompletes the address for the user
    - Above the textbox is the label “Address A”
- Text box labeled “Address B”
    - Located to the right of the “Address A” textbox
    - A textbox that the user can type an address into
    - Autocompletes the address for the user
    - Above the textbox itself is the label “Address B”
- Button labeled “Find My Route”
    - A button labeled “Find My Route”
    - Placed beneath the section with the two address text boxes
    - When clicked it sends the user to a page that displays
- Beneath the "Find My Route” button is an interactive map of the United States based on interactive maps from google maps and various travel websites

    - About

Main Content

- Heading text: Planning a Trip? Need To Save Money? Need To Save Time?
- Sub text: Do you need to plan a trip and want to know the most efficient way to travel from your home to your destination? Group 3 presents the Travel Aggregator that takes in all manner of relevant information from various forms of transit and produces the most efficient routes for you to take from point A to B. The Travel Aggregator plans to solve the dilemma that many traveled people face, estimating the cost and time of a trip. With our software, users can efficiently find the transit routes that best fit their pockets and schedules.
- Return to home button: a button labeled “Plan Your Route” that takes the user back to the homepage
